

About Us

Since 1995, Fox Valley Quality Control Lab has provided fast, accurate, and reliable services at a fair price. We achieve this reputation through years of constant commitment and reliable customer service. Our lab provides a variety of services from milk analysis, to water testing for residential, public, and the agricultural industry.

Contact Fox Valley Quality Control Lab for more information on our water testing. Here at Fox Valley Quality Control Lab, we believe in quality testing to ensure your lab results are done right, to help put you at ease and provide peace of mind.

Working with an independent, third-party service provider increases credibility with clients. No one has more credibility with clients than Fox Valley Quality Control Lab.

Efficient, Quality Service

In order to provide efficient, quality service, Fox Valley Quality Control Lab:

- ◆ Directs a fleet of transportation courier services
- ◆ Works with clients to provide the most convenient access to post-analysis information
- ◆ Efficient data retrieval for results

Produce Safety Rule

Agricultural water has been identified as one probable route of produce contamination with pathogens that can cause human illness. As a result, new testing requirements have been put in place for certain water used in agriculture. The rule currently requires agricultural water from wells to be tested along with surface waters used in agricultural production. In addition to these water sources, other on farm water sources will require presence/absence testing for generic E. coli.

Where Quality Comes First!

Water Testing

- ◆ Fast, efficient test results
- ◆ Quality service by state-certified lab technicians
- ◆ Attention to detail
- ◆ Convenience in receiving test results, for your organization and your patrons

Water Sample

Why Should I Test My Well Water?

While most private wells provide safe and clean drinking water, this may not always be the case. Your water can become contaminated by bacteria and other impurities that are not filtered out when water seeps through the soil. These impurities can get into your water through cracks in your well wall, weakened seals, or fractures in underlying bedrock. Many times, we are not able to see, smell or even taste contaminants that may be lurking in our water. Over time, these contaminants can cause illness and other health issues. It's recommended that your well water is tested annually to ensure safe and clean water is available for you and your family.

Meet Our Team

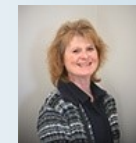

Cheryl is a graduate of UW-Madison with a degree in Dairy Science with a Food Science emphasis. She currently serves as the Fox Valley Quality Control Lab Director of Lab Services and leads our

team of analysts. She is also a current member of the Wisconsin Laboratory Association (WLA). Cheryl has been using her farm knowledge with her lab experience to ensure quality results for over 20 years with Fox Valley Quality Control Lab. Not only does Cheryl understand, but she also commits herself and her team to a quality result that can be consistently trusted.

Toni has been working in the dairy industry for over 15 years. She formerly served as a lab analyst at Agropur Food (formerly Trega Foods) in Weyauwega, Wis. Toni is also currently member of Wisconsin

Laboratory Association (WLA). When joining the Fox Valley Quality Control Lab team, she brought an extensive understanding of product testing and knowledge to the lab. She currently serves as our Bactoscan specialist and is also the mastermind behind the Fox Valley Quality Control Lab's website.

Joining the team in May of 2017, Cheryl brings extensive knowledge and background to the Fox Valley team. Cheryl graduated from UW-Platteville with a degree in Animal Science with a Dairy

Science emphasis. Having been involved in the dairy industry for over 25 years, Cheryl holds experience as a DHI field technician, dairy plant field representative, and laboratory technician. Her wide variety of experience offers insight and knowledge that ensures consistent and quality test results for our members here at Fox Valley Quality Control Lab.
