

Where Quality Comes First.

Located in the heart of Fox Valley, our lab specializes in milk and water lab testing for patrons across Eastern Wisconsin. We are dedicated to quality service, backed by efficient testing and accurate results. The lab is conveniently located just a few miles off of highway 41 in Kaukauna, Wisconsin, making it easily accessible for sample drop-offs.

A wide variety of lab testing services are performed at our lab facility, and we will continue to look for more ways to serve the needs of our clients. All tests are performed by state-certified lab analysts in our state-certified laboratory.

Log-In Information for Individual Patrons and Plants is located at the top right of our website. Information is updated on a regular basis, with milk bacteria, components and somatic cell test results updated and posted daily.

Individual farm results may be accessed directly through www.foxvalleyqclab.com. Since test results are posted on our website daily, clients and patrons are able to easily view the most up-to-date information.

Individual farms need to call or email the lab to set up an account with a secure user id and password. Results are easily located under the Patron Log in tab, once user id and password are entered. Milk tank results are located under the Standard tab and individual cow samples are located under the Load\Cow tab.

To set up your account online to view tests please contact the lab either by phone or email.
